

WHO WE ARE

West End & Marylebone Primary Care Network is made up of 9 Local GP practices:

- Cavendish Health Centre
- Covent Garden Medical Centre
- Crawford Street Surgery
- Fitzrovia Medical Centre
- Great Chapel Street Medical Centre
- Marylebone Health Centre
- Mayfair Medical Centre
- Soho Square General Practice
- Soho Square Surgery

PCN Clinical Director: Dr Afsana Safa
PCN Chair: Miles Davis

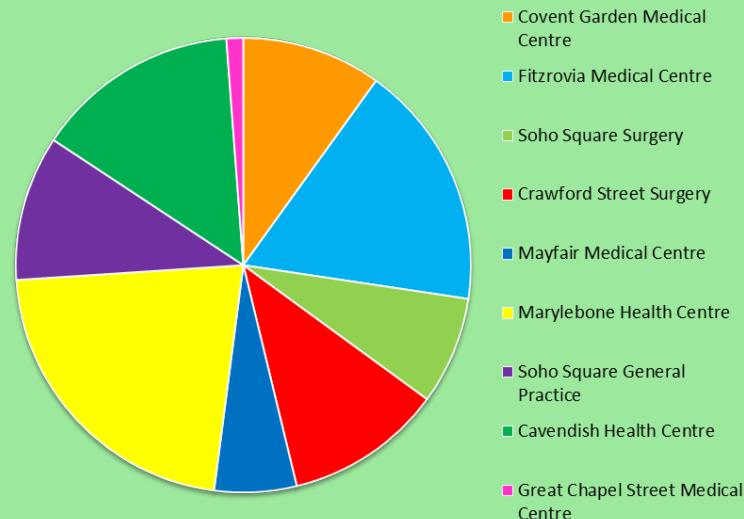

Staff from each practice meet monthly as a PCN to share, discuss, and plan how best to support the local community as a network.

OUR POPULATION

West End & Marylebone PCN has a high population of older working age patients. We have a strong Asian community around the Soho practices and high levels of homeless patients as Great Chapel Street Medical Centre provides a specialised homeless walk in centre. The population has the lowest levels of moderate and severe health care needs.

41,041 Patients are supported by West End & Marylebone PCN

WHAT ARE WE DOING AS A PCN?

MORE THAN JUST A GP

Working together we provide out of hospital services to support you to live well at home within your own community, for ECG, ABPM, Spirometry, Diabetes, and Warfarin monitoring.

EXTENDED HOURS

We support all patients across West End & Marylebone PCN by providing extended hours to our usual hours at specific locations.

PHARMACISTS

We are exploring how our current Clinical Pharmacists operate across the PCN and looking to create a clear standardised provision ensuring high consistent levels of Clinical Pharmacy at all practices.

ROUTINE APPOINTMENTS & CHECKUPS

Working alongside experts we are developing systems that better identify the multiple health needs of patients to establish more appropriately timed appointments to manage and monitor health conditions at one extended appointment.

PATIENT PARTICIPATION

To ensure Patients are kept at the heart and central focus of the PCN we are exploring new and different ways of engaging with the local population to feed into the development of the PCN.

WHAT IS A PRIMARY CARE NETWORK?

THE PRIMARY CARE NETWORK (PCN) MODEL WAS DEVELOPED BY THE NATIONAL ASSOCIATION OF PRIMARY CARE (NAPC) TO STRENGTHEN AND REDESIGN PRIMARY CARE. IT AIMS TO LINK STAFF FROM GENERAL PRACTICE, COMMUNITY SERVICES, MENTAL HEALTH SERVICES, SOCIAL CARE & VOLUNTARY ORGANISATIONS TO DELIVER JOINED UP CARE.

PRIMARY CARE NETWORKS BUILD ON THE CORE OF CURRENT PRIMARY CARE SERVICES AND ENABLE GREATER PROVISION OF PROACTIVE, PERSONALISED, COORDINATED AND MORE INTEGRATED HEALTH AND SOCIAL CARE. CLINICIANS DESCRIBE THIS AS A CHANGE FROM REACTIVELY PROVIDING APPOINTMENTS TO PROACTIVELY CARING FOR THE PEOPLE AND COMMUNITIES THEY SERVE.
